River Cleanups

Every year, Great Salt Lakekeeper plans community based river cleanup projects throughout the watershed. With the help of volunteer groups we remove tons of garbage from the waterways.

Organizations can utilize Great Salt Lakekeeper's services to plan river cleanup projects in their cities and neighborhood communities.

In 2007, Great Salt Lakekeeper received an award from the Utah Pollution Prevention Association for our 2006 Jordan River Cleanup Campaign.

Watershed Tours

Great Salt Lakekeeper provides a unique opportunity to experience the wonderful waterways of the Great Salt Lake watershed region that combines environmental education and recreation.

We operate a fleet of 10 canoes and provide group tours for up to 30 people to some of the following watershed locations:

- Jordan River
- Utah Lake
- Bear River
- Jordanelle Reservoir
- Little Dell Reservoir
- Smith and Morehouse Reservoir
- And many more locations ...

Great Salt Lake Mercury Reduction Program

Mercury concentrations in Great Salt Lake are the highest levels ever tested by federal scientists, and may pose significant health risks to humans and wildlife living in the drainage basin region.

Great Salt Lakekeeper is working to help evaluate the extent of mercury in our watershed, identify probable sources, assess human health risks, determine economic impacts, and to provide public education.

The extent of mercury compounds in our watershed may be the result of toxic emissions from coal-fired power plants or gold mines operating nearby in Nevada.
